

PROJECT SHIELD

ABOUT PROJECT SHIELD

Project Shield is a public-private partnership effort growing across the Gulf Coast. Originating within the City of Mobile, through the Mobile Police Department Cyber-Intelligence Unit, Project Shield allows law enforcement and first responders access to live video feeds and camera systems during times of critical emergency and investigation. Ideas of the past about how law enforcement can respond better, more strategically, and more quickly, have now given way to reality.

Project Shield is the gateway between the valuable assets possessed by virtual crime deterrence, local business surveillance systems, and even camera systems sponsored by nearby homeowners' associations. Project Shield is more than just camera system access, it's about partnership.

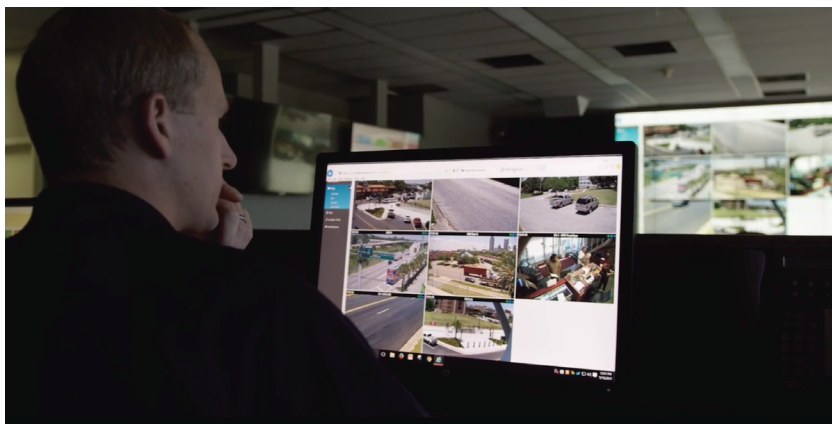

Help make Mobile the safest city in America with respect for everyone.

CONNECTING

Partnering with Project Shield is open to anyone who has a live video camera surveillance system, whether at work, at home, or at school. The Mobile Police Department is excited to review interest from all prospective partners. Currently, Project Shield connects with public and private schools, government and public entities, private business concerns, as well as individual homeowners and private homeowners' or property owners' associations.

Project Shield's value is widely recognized and has been adopted by other agencies, establishing similar partnerships in their local communities. If you live, work, or visit the Mobile community, you have a vested interest in keeping Mobile safe. Project Shield takes community

Officers can quickly access Project Shield video feeds from the state-of-the-art Joint Operations Center.

involvement to the front lines of technological crime fighting. Although these camera feeds are not monitored, they are easily accessible during times of emergency or law enforcement investigation. What better, than to see where officers are responding, before they even get there, resulting in a significantly higher chance of apprehending the offender. Join today, and partner with the thousands of live video feeds already connected through Project Shield.

HOW TO JOIN

Joining the team is easier than you think. There are no specific camera systems required, other than the minimal requirement that each system must connect to the Internet. This requirement is what allows for the remote connection by the Mobile Police Department. Our connections are secure, and we enforce strict privacy guidelines with how your video feed is handled.

Join today at mobilepd.org/project-shield or call 251-208-1781. Ask about other training programs and presentations available for partners.
